

Artist Statement

I create digital surreal scenes in the form of collages on my computer. I get my inspiration from music, other artists or nature. The magic of the night and the moon drives me. The mysticism of the surreal without borders guides me and my imagination with surprises for me makes it exciting, every time anew. I am always curious how I could combine different ideas that do not seem to belong together. Or have you ever seen a house floating on a cloud or a ghost waiting for the bus?

Sometimes I sit at a single work for days and don't know what is missing. Sometimes a collage is finished in just a few hours. It depends on my surroundings, on the events in my life and on the time of day. I have found that I create best in the evening when it is dark and I can fully concentrate on the process of editing. I am always happy when I can inspire others, when I can break the rules of the real and take the viewer into a different, mystical and surreal world of imagination. My dream is to reach many more people, to arouse many more emotions and to stimulate the imagination.
